

# Operation Manual

## High Resolution Day & Night 10X Zoom Camera

### WDN-1003XP

Please read carefully before using and keep in a safe place.  
Design and specifications are subject to change without notice.

V.07C

The lightning flash with an arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated dangerous voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**INFORMATION-** This equipment has been tested and found to comply with limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**WARNING-** Changes or modifications not expressly approved by the manufacturer could void the users authority to operate the equipment.

**CAUTION-** To prevent electric shock and risk of fire hazards:

- Do NOT use power sources other than that specified.
- Do NOT expose this appliance to rain or moisture.

This installation should be made by a qualified service person and should conform to all local codes.

## 1.0 Features

### • A/F 10x Optical Zoom

The built-in WDN-1003XP optical zoom lens is a highly durable component. It features auto focus, auto iris, and zoom functions.

### • DNR (Digital Noise Reduction)

The amount of low illuminance noise has been significantly reduced, and the signal-to-noise ratio (S/N ratio) as well as horizontal resolution have been improved, resulting in a clear and sharp image display even in the dark.

### • High Sensitivity

The built-in high sensitivity SONY COLOR CCD enables a clear image even in 0.005Lux(Sens-up, Color) or lower illumination.

### • High Resolution

Featuring 500TV line horizontal resolution in color mode and 570TV line horizontal resolution in BW mode, the camera features Sony's 410,000 pixel CCD and captures clean, noiseless, high-quality images.

### • DAY & NIGHT

The camera automatically determines whether it is night time or day time, selecting operating mode automatically. The camera operates in color mode during day light conditions and BW mode in night conditions for clearer identification.

### • 3-Axis camera mechanism

The WDN-1003XP is especially incredibly flexible to install with its 3-axis camera construction, which makes the camera wall or slope mountable.

### • RS-485 Function

The camera, using a RS-485 communication can remote control relate to ZOOM/FOCUS and OSD menu functions.

### • Sub Monitor Function

The sub monitor function enables easy adjustment of the camera angle within the monitoring range during its installation.

### • Miscellaneous Functions

Other miscellaneous functions of the camera include privacy zone masking, digital zoom, line lock synchronization (INT/LL), freeze, horizontal inversion, and user-configured presets.

## 2.0 Warnings

This information is provided to ensure your safety and to prevent any losses, financial or otherwise. Please read it carefully and use the product accordingly.

### • Warning/Attention/Special Mark Messages

-  Ignoring this information may result in material loss and/or serious personal injuries including death.
-  Indicates "Never Allowed."
-  Indicates "No Disassembling."
-  Indicates "Must Observe."

**Correct Disposal of This Product**  
(Waste Electrical & Electronic Equipment)  
(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

## 3.0 Precautions

**Do not install the camera in extreme temperature conditions.**

Only use the camera under conditions where temperatures are between -10 Deg. C and +50 Deg. C. (14 Deg. F and 122 Deg. F). Be especially careful to provide ventilation when operating under high temperatures.

**Do not install or use the camera in an environment where the humidity is high.**

It can cause the image quality to be poor.

**Do not install the camera under unstable lighting conditions.**

Severe lighting change or flicker can cause the camera to work improperly.

**Do not touch the front lens of the camera.**

It is one of the most important parts of the camera. Be careful not to be stained by fingerprint.

- Note**
- If the camera is exposed to spotlight or object reflecting strong light, smear or blooming may occur.
  - Please check that the power satisfies the normal specification before connecting the camera.

**Do not drop the camera or subject them to physical shocks.**

It can cause malfunctions to occur.

**Never keep the camera face to strong light directly.**

It can damage the CCD.

**Do not expose the camera to rain or spill beverage on it.**

If it gets wet, wipe it dry immediately. Liquids can contain minerals that corrode the electronic components.

**Do not expose the camera to radioactivity.**

If it is exposed to radioactivity, For heated CCD, it will be out of order.

## 4.0 Components

10X Zoom Camera  
WDN-1003XP

Operation Manual

Mount Bracket

Screw

Cable

## 5.0 Names and Functions of Parts

### 5.1 Front

- ❶ **Lens protection cap**  
Please cover the lens when not using it.
- ❷ **Green LED**  
In RS-485, LED turns ON/OFF when receiving specific data.
- ❸ **Yellow LED**  
In RS-485, LED turns ON/OFF when receiving specific data.

### 5.2 Top & Bottom

- ❶ **Mounting bracket screw hole**  
Mounting bracket screw hole  
please use the screw hole when fixing the camera onto the mounting bracket.  
please use the clamp screw as specified below.
  - The mounting bracket can be separated and attached to the top of the camera.  
In this instance please do not tighten the screw to a depth of more than 5mm  
otherwise serious damage can occur to the inside of the camera.
- ❷ **Video output & Power input terminal**  
Sends video signal and connectors to the video input terminal of the monitor.  
Receives power and connectors to the video input terminal of the monitor.

Pin	Description
1	TRX- (RS-485 -)
2	TRX+ (RX-485 +)
3	NC
4	GND
5	VIDEO
6	DC 12V

### 5.3 Rear (Key Function)

- ❶ **BLC Key Button**  
BLC Key operates BLC OFF-BLD HIGH in order of precedence.
- ❷ **NEAR Key Button**  
Press NEAR Key to focus the lens to far subject.  
This button is used for right in the menu mode.
- ❸ **SHUTTER Key Button**  
SHUTTER speed can be changed each time when pressing the button.  
Displays operates in order of precedence of ESC, 1/60, 1/100, 1/120, 1/250, 1/500, 1/700, 1/1000, 1/1600, 1/2500, 1/5000, 1/7000, 1/10000.
- ❹ **FAR Key Button**  
Press FAR Key to focus the lens to far subject.  
This button is used for left in the menu mode.
- ❺ **TELE ZOOM Key Button**  
When pressing TELE ZOOM key user preset 1 value displays on the screen.  
After 10 second, user preset 2 value displays on the screen.  
This function repeats each time when pressing the Tele zoom key.
- ❻ **SETTING Button**  
SET Button: Used for the menu display. This button can be used to confirm settings after changing the value of the selected function or current conditions.  
TELE & WIDE Button: Used for selecting items by moving the cursor up or down on the menu screen.  
NEAR & FAR Button: Used when changing items values, by moving the cursor to the left or right on the menu screen.

### ⑦ TELE Key Button

Press TELE (Telephoto) to zoom in.  
This button is used for UP in the menu mode.

### ⑧ ADJUSTMENT Key Button

User preset 3, 4 value displays repeatedly when pressing Adjustment key.  
When it is User preset 3 statue, RED LED is ON and when it is suer preset 4 statue, LED is OFF.  
Used user preset 3 for special purpose of night mode. Used preset 4 for break up mode.

### ⑨ WIDE Key Button

Press WIDE (Wide ange) to zoom out.  
This button is used for DOWN in the menu mode.

## 6.0 Connection

### 6.1 Connecting to Monitor

- Connect the VIDEO-OUT jack to the VIDEO-IN jack of monitor.
- ❑ As the connecting method varies with the instruments, refer to the manual supplied with the instrument.
  - ❑ If necessary, you can connect the monitor to the REMOTE jack on the back of your camera.
  - ❑ Only connect the cable when the power is turned off.
  - ❑ Set the 75 Ohm / Hi-Z selection switch as shown below if you have an intermediate device.

### 6.2 Connecting to Power

Connect the adaptor to the power input connector as shown in the figure below.  
The recommended adaptor specification for WDN-1003XP is DC 12V / 500mA.

- ❑ Standard voltage for camera operation : DC 12V ± 10%
- ❑ There may be some deviation in voltage drop depending on the type of wire and the manufacturer.

### 6.3 RS-485 Communication Control

Using a RS-485 communication, it will be able to control the ZOOM/FOCUS and OSD menu at the Controller or DVR.

- ❑ The case which it controls from the PC Using a RS-485 converter, It connects to RS-485 control cable outside camera and serial cable. EX) SERIAL PORT OF THE PC(COM1) -- SERIAL CABLE -- RS-485 CONVERTER -- RS-485 CONTROL CABLE
- ❑ The case which it controls from the DVR or System Controller . It connects the RS-485 control cable in the connection terminal of 485 control boards which are connected with the DVR or System Controller.

485 CONTROL BOARD CONNECTION TERMINAL	RS-485 CONTROL CABLE
(+)CONNECTION TERMINAL	RED (TRX+)
(-)CONNECTION TERMINAL	WHITE(TRX-)

**Note** • When you construct external control systems for a camera control, please use to the PELCO-D PROTOCOL.  
• When you connecting to RS-485 control cable, please peel off the outer skin inside the RS-485 control cable.

## 7.0 Camera Operation

### 7.1 Key Function

Use the nine key function on rear of the camera

#### ① TELE ZOOM KEY

When pressing TELE ZOOM KEY user preset 1 value displays on the screen.

After 10 second, user preset 2 value displays on the screen.

This function repeats each time when pressing the Tele zoom key.

Note that user preset do not work unless the value is set up.

- **TELE ZOOM setting** : Set user preset value 1 when pressing tele zoom key.

(USER PRESET 1 Setting) Setting value can be determine by user however, basic default value and optical 10x should be preset before packing.

- **WIDE ZOOM setting** : Set user preset value 2 when pressing tele zoom key.

(USER PRESET 2 Setting) Setting value can be determine by user however, basic default value and optical 1x should be preset before packing.

- **DURATION Fixed** : While tele zoom key is operating.

It will be operated in about 10 seconds after user preset 1 moves to user preset 2.

#### ② SHUTTER KEY

SHUTTER speed can be changed each time when pressing the button.

Displays operates in order of precedence of ESC, 1/60, 1/100, 1/120, 1/250, 1/500, 1/700, 1/1000, 1/1600, 1/2500, 1/5000, 1/7000, 1/10000. When ESC operates RED LED is OFF, when shutter operates LED is on.

#### ③ BLC KEY

BLC KEY operates BLC OFF- BLD HIGH in order of precedence.

When BLC operates RED LED is ON, when BLC is not operating LED turns off.

#### ④ ADJUSTMENT KEY

When pressing this button user preset 3 and 4 displays and repeats automatically.

Note that unless preset 2 and 4 value is presetted, the function does not operate.

Used user preset 3 for special purpose of night mode. Used preset 4 for break up mode.

When it is User preset 3 statue, RED LED is ON and when it is user preset 4 statue, LED is OFF.

- **NIGHT setting** : 1) At FOCUS SETUP/ MODE AUTO, fix the ZOOM POSITION SET UP of tele to maximum 1x.  
(USER PRESET 3 Setting) 2) Setting EXPOSURE at mode.

SHUTTER >> A.FLK AGC >> OFF DNR >> OFF

SENS-UP >> B/W

3) Setting ETC at mode DAY/NIGHT >> BW.

- **NIGHT mode cancel setting** : At FOCUS SETUP/ MODE AUTO, fix the ZOOM POSITION SET UP of WIDE to maximum 1x.

Remaining value can be fixed according to the basic default value.

Note that the function does not operate unless user preset 3 and 4 is fixed.

### 7.2 Controlling the temporarily Protocol Yellow LED & Green LED ON/OFF.

There are two different port. At RS-485, if it receives specific data LED turns ON/OFF.

Note that, Communication speed only operates in 38400bps.

LED Operation	Protocol
Yellow LED OFF	C5 9E 00 00 00 63
Yellow LED ON	C5 9E 01 00 00 64
Green LED OFF	C5 9F 00 00 00 64
Green LED ON	C5 9F 01 00 00 65

### 7.3 Menu Configuration

### 7.4 Menu Setup

- ❶ Press the SET button to access the main setup mode.
  - Main setup menu is displayed on the monitor screen.
- ❷ Select the desired feature using the TELE(UP) or WIDE(DOWN) button.
  - Each pressing of the TELE(UP) or WIDE(DOWN) button moves the indicator to the next or previous feature.
  - Move the arrow indicator to the desired feature item.
- ❸ Change the status of the selected feature using the FAR(LEFT) or NEAR(RIGHT) button.
- ❹ When completed, move the arrow indicator to 'EXIT' and press the SET button.

Select feature using the TELE(UP) or WIDE(DOWN) button.

Change the status using the FAR(LEFT) or NEAR(RIGHT) button.

- Note**
- Features marked with a ↕ have an accessible submenu.
  - Access the submenu by pressing the SET button.

#### 7.4.1 Cam Title

Use this feature to designate a name for the camera, which will display on the monitor screen.

- ❶ Press the SET button to display the main setup menu and move the arrow indicator to 'CAM TITLE' using the TELE(UP) or WIDE(DOWN) button.
- ❷ Set 'CAM TITLE' to 'ON' using the FAR(LEFT) or NEAR(RIGHT) button.

- Note**
- If the CAM TITLE feature is set to 'OFF', the name will not be displayed in the monitor.

- ❸ Press SET button.
- ❹ You can enter up to 15 characters.
  - ❶ Move the cursor to the character entry field using the FAR(LEFT) or NEAR(RIGHT) button.
  - ❷ Use TELE(UP), TELE(DOWN), FAR(LEFT), and NEAR(RIGHT) buttons to select a desired character.
  - ❸ Press the SET button to confirm selection of the blinking character. The character is then saved, and the cursor in the entry field moves to the next position.
  - ❹ Repeat steps ❶ through ❸ until the desired name has been entered.

- Note Correcting Mistakes:** Move the cursor to 'CLR' and press the SET button to clear the entire entry. To modify one character, use ← or → to position the cursor above the character to be modified and click the SET button after selecting the character to enter.

- ❶ Select on screen position of the CAM TITLE.
  - ❶ Move the cursor to 'POS' and press SET button.

- ❷ The CAM TITLE is displayed on the top-left of the monitor screen. (Default position).

- ❸ Select the position by using the 4-directional buttons, then press the SET button to confirm the position.

### 7.4.2 White Balance Control

Your camera provides three 'WHITE BAL' control modes for your choosing in adjusting the white balance.

- ① Press the SET button to access the main setup menu and move the indicator to 'WHITE BAL' using the TELE(UP) or WIDE(DOWN) button.
- ② Set 'WHITE BAL' using the FAR(LEFT) or NEAR(RIGHT) button.

The three white balance control modes are as follows:

➤ **ATW(Auto Tracking White Balance):**

- **OUTDOOR:** This mode can be used within the color temperature range 1800~10500°K (Ex: fluorescent light, outdoor, sodium vapor lamp or inside tunnels).
- **INDOOR:** This mode can be used within the color temperature range 3000K~10500°K

➤ **AWC(Auto White balance Control):**

The white balance is automatically adjusted in a specific environment. In order to obtain the best result, press the SET button while the camera focuses on white paper. If the environment including the light source is changed, you have to adjust the white balance again.

- **Manual:** To fine adjust, select the Manual mode. You can increase or decrease the red or blue factor while monitoring the difference on the screen. Set to 'MANUAL' mode and press the SET button. Increase or decrease the value for red(R-Gain) and blue(B-Gain), watching the color of the picture, and press the SET button when you obtain the best color.

**Note** Proper White Balance may not be obtained under the following conditions.

- ① When the scene contains mostly high color temperature object, such as a blue sky or sunset.
- ② When the scene is dim.
- ③ If your camera directly faces a fluorescent lamp or is used in an environment of varying lighting conditions.

#### MAIN SETUP

### 7.4.3 Backlight

When there is a strong backlight behind the object, clear images of the background as well as the object can still be obtained by using the BACKLIGHT function.

- ① Please position the arrow to point to 'BACKLIGHT' on the SETUP menu by using the TELE(UP) and WIDE(DOWN) buttons.
- ② Please select the mode you wish to operate by pressing the FAR(LEFT) or NEAR(RIGHT) button.

#### MAIN SETUP

CAM TITLE	OFF
WHITE BAL	ATW ←
▶ BACKLIGHT	OFF
MOTION DET	OFF
FOCUS	←

- **HIGH/MIDDLE/LOW:** You can adjust the sensitivity of Backlight Compensation.

- **OFF:** BACKLIGHT function does not operate.

BACKLIGHT OFF

### 7.4.4 Motion Detection

This product has a feature that allows you to observe movements of objects in 4 different areas on the screen, and the words 'MOTION DETECTED' appear on the screen when movement is detected; hence a single individual can conduct supervision efficiently. The camera detects an object's movement by sensing disparity of outline, and level of brightness and color.

- ① Please press the SETUP button.
  - OFF: MOTION DETECTION mode is cancelled.
  - ON: Any motion in the selected areas is observed.
- ② Please press the SETUP button.
  - OFF: MOTION DETECTION mode is cancelled.
  - ON: Any motion in the selected areas is observed.
- ③ Please select the area you wish to observe from the 4 areas in AREA SEL mode.
- ④ Please select ON mode for the chosen area.
- ⑤ Please adjust the size of the area to be observed by using the TELE(UP), WIDE(DOWN), FAR(LEFT) or NEAR(RIGHT) button.
- ⑥ Please press the SETUP button to save changes and complete the setting.

#### MD SETUP

▶ DISP ALARM	OFF
AREA SEL	AREA1
AREA MODE	ON
TOP	10 .....
BOTTOM	50 .....
LEFT	10 .....
RIGHT	50 .....
END	

**Note** Tips on Using the Motion Detection Feature.

- The camera interprets sudden changes in lighting and subsequent change in brightness of an object as motion.
- With the feature enabled, other algorithms may require additional time to operate than usual.
- This system does not guarantee prevention of fire or theft. The manufacturer shall not be held responsible for any accident or damage incurred.

### 7.4.5 Focus

- ① Press the SET button to access the main setup menu and then position the indicator over 'FOCUS' using the TELE(UP) or WIDE(DOWN) button.
- ② Press the SET button.

⇒ **MODE:** You can select the most suitable zoom mode.  
Move the arrow indicator to 'MODE'  
using TELE(UP) or WIDE(DOWN) button.

- **AUTO :** Select AUTO and press the SET button to confirm. Increase or decrease optical zoom (ZOOM) or digital zoom (DZOOM) positions using the TELE(UP) or WIDE(DOWN) button while verifying the changes on screen. Enabling D-ZOOM (ON) means that digital zoom will activate once optical zoom ends. Focus is automatically adjusted with moving zoom.
- **ONE PUSH :** Focus is automatically adjusted just once, after zoom position is changed. Select 'ONE PUSH' and press the SET button to confirm. Increase or decrease optical zoom (ZOOM) or digital zoom (D-ZOOM) positions using the directional buttons while verifying the changes on screen. Press the SET button once desired image quality is obtained.

END	

- Note**
- Once 'AUTO' mode is set, the user can configure Sens-Up limit by increasing /decreasing the shutter speed (e.g.: x2, ..., x32, x64, ..., x128).
  - Enabling Sens-Up increases camera sensitivity and may result in additional noise and/or other phenomenons. This is normal

**7.4.7 Special**

- ▶ Press the SET button to access the main setup menu and then position the indicator over 'SPECIAL' using the TELE(UP) or WIDE(DOWN) button.
- ◁ Press the SET button.

⇒ **USER PRESET:**

Preset user-designated configurations using this feature. Position the indicator over 'USER PRESET' using the TELE(UP) or WIDE(DOWN) button and then set to 'ON' using the FAR(LEFT) or NEAR(RIGHT) button. Press the SET button to confirm.

- **PRESET NO:** Up to eight different preset configurations are supported.

MOTION DET	OFF
FOCUS ↕	
EXPOSURE ↕	
▶ SPECIAL ↕	

## SPECIAL SETUP

▶ USER PRESET	OFF
PRIVACY	OFF
DAY/NIGHT	COLOR ↕
SYNC	INIT

## USER PRESET SETUP

▶ PRESET NO.	NO.1
PRESET MODE	OFF
PRESET SAVE	
PRESET CLEAR	
END	

- **PRESET MODE:** Configure initial settings under FOCUS, EXPOSURE, etc.

USER PRESET MODE SETUP

FOCUS ↕  
EXPOSURE ↕  
ETC ↕  
END ↕

- **PRESET SAVE:** Save configured preset.

USER PRESET SETUP

PRESET NO. NO.1  
PRESET MODE OFF  
▶ PRESET SAVE  
PRESET CLEAR

- **PRESET CLEAR:** Clear configured preset.

USER PRESET SETUP

PRESET NO. NO.1  
PRESET MODE OFF  
PRESET SAVE  
▶ PRESET CLEAR

- **END:** Revert to the SPECIAL SETUP menu.

- ☞ **PRIVACY:** Mask privacy area using this feature.  
The mask area expand/contract upon the zoom position.

SPECIAL SETUP

USER PRESET OFF  
▶ PRIVACY OFF  
DAY/NIGHT COLOR ↕

- **GROUP SEL:** Choose up to eight groups.  
Each group can consist of four mask areas.
- **AREA SEL:** Configure eight mask areas.
- **AREA MODE:** Mask area display.
- **MASK TONE:** Adjust desired mask color level.
- **TOP:** To move the mask area up.
- **BOTTOM:** To move the mask area down.
- **LEFT:** To move the mask area left.
- **RIGHT:** To move the mask area right.

SET PRIVACY

GROUP SEL.	GROUP 1
AREA SEL	AREA 1
AREA MODE	ON
MASK TONE	50
TOP	45
BOTTOM	110
LEFT	45
RIGHT	95
END	

- ☞ **DAY/NIGHT:** Select from COLOR, BW or AUTO modes.
  - **COLOR:** Color mode.
  - **B/W:** BW mode.
  - **AUTO1, 2:** The camera automatically detects lighting conditions and selects the mode accordingly.  
Auto 1 mode is switched to IR Cut Filter more lightning conditions than Auto 2.

SPECIAL SETUP

▶ USER PRESET OFF  
PRIVACY OFF  
DAY/NIGHT COLOR  
SYNC INIT  
COMM ADJ  
IMAGE ADJ  
END

**Note** □ When selecting AUTO2 mode, the AGC is fixed at HIGH mode.

- ⇒ **SYNC:** Two synchronization modes are available  
INTERNAL and EXTERNAL LINE-LOCK.  
In LINE-LOCK mode, it synchronizes the camera's video out  
signal to the external SYNC signal.
- **INT:** Internal synchronization.
  - **LL:** External line-lock synchronization  
If you choose 'LL', you can adjust the desired phase. Press the SET button.  
You can adjust the desired phase from 0 to 359.

SPECIAL SETUP	
USER PRESET	OFF
PRIVACY	OFF
DAY/NIGHT	COLOR
▶ SYNC	INIT
COMM ADJ	

- Note**
- For NTSC models, the line-lock mode can be used if the external SYNC signal frequency is at 60Hz.
  - For PAL models, the line-lock mode can be used if the external SYNC signal frequency is at 50Hz.

- ⇒ **COMM ADJ:** Use this feature to select communication protocol.  
Position the indicator over 'COMMUNICATION' using  
the TELE(UP) or WIDE(DOWN) button.
- **CAM ID :** Assign ID number to the camera.  
It is restricted available to set ID from 1 to 255.
  - **DISP CAM ID:** Displays camera ID on top left corner of the screen.
  - **BAUD RATE:** Configure baud rate from 9600, 19200, 38400, 57600bps.
  - **UART MODE:** Configure parity bit to NONE, EVEN, or ODD.  
Data bit is set to 8bit, and stop bit to 1bit.  
Set the UART MODE to EVEN if using the Remote Controller.
  - **RET PKT :** Used to transfer a packet.
  - **END**

SPECIAL SETUP	
USER PRESET	OFF
PRIVACY	OFF
DAY/NIGHT	COLOR
SYNC	INIT
▶ COMM ADJ	
IMAGE ADJ	
END	

- ⇒ **IMAGE ADJ:** Includes image quality or special function factors.
- **FREEZE:** Use this feature to freeze capture an image.
  - **H-REV:** Use this feature to horizontally inverse the screen.
  - **V-REV:** Use this feature to vertically inverse the screen.
  - **SHARPNESS:** Increasing this value sharpens object edges.  
Too high of a setting, however, produces noise  
and may obscure the image.
  - **COLOR AGAIN:** Adjusting this value affects the chroma level only;  
the burst level is unaffected.

SPECIAL SETUP
